

fun decorating

the pillow stylist

My name is Frances, and I'm passionate about pillows. As the style director here at *HGTV Magazine*, I'm on a mission to bring my love of all things cushiony to these pages. For a simple sofa spruce-up, here's my guaranteed recipe. Just mix three ingredients...

stripes + florals + solids

Look 1

Why it works:

A graphic flower print with smaller stripes gets the job done—the play on proportion is like pairing skinny jeans with an oversize top. Throw in some solids so the look isn't dizzying.

FOR SHOPPING SOURCES, SEE PAGE 142.

Why it works:

Stripes don't have to play second fiddle to pretty blooms—let them upstage those flowers! P.S. I always like to have fun with shapes and sizes, too: rectangles, squares, bolsters—put 'em all together.
